DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C.
 § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (e) the invention was described in-
 - (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
 - (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- 2. Claims 1 and 4 are rejected under 35 U.S.C. § 102(e) as being anticipated by Payne. (U.S.6,523,937)

Payne (col.4, line 9 - col.5, line 45) discloses the instant claimed method for processing an image in a printer capable of printing a two-color image, comprising the steps of:

setting a primary color and a secondary color as printable colors in the printer (characterized by a primary color and an alternate color);

receiving an original image (characterized by full color image from original image), and producing color difference values associated with the primary color, the secondary color and a white color on an original image pixel-by-pixel basis (characterized by data represent by a primary color, an alternate color, and a

white color characterized by the background color of the print paper; col.4, lines 9-20), and converting a corresponding pixel color of the original image into the primary, secondary or white color associated with a smallest color difference value (it is apparent that with the printer ability it would try to closely match the value of the three color with the full color of the original image).

converting the received original image into a bitmap image before the color converting step is carried out (col.4, lines 59-61).

Allowable Subject Matter

3. Claims 2-3, 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Contact Information

4. Any inquiry concerning this communication should be directed to examiner Thinh Nguyen at telephone number (571) 272-2257. The examiner can generally be reached Mon-Friday from 9:00A – 5:00P. The official fax phone number for the organization is (703) 872-9306.

The examiner supervisor, Stephen Meier, can also be reached at (571) 272-2149.

Any inquiry of a general nature or relating to the status of this application should be directed to the group receptionist whose telephone number is (703) 308-1782.
